

CONTEMPORARY VILLAS

Bespoke Villas

WE BELIEVE IN PERFECTION

Perfection exists

It is something you can see and feel

It are the villas we build

For more than 20 years, this belief has inspired us to work harder. Today, we can proudly say that we specialise in turning our clients' dreams into a reality.

We are promoters and builders, with a team of architects, designers and technicians who combine their forces to offer the highest grade of construction, creating the perfect paradise to enjoy the highest quality of life.

Let's not fool ourselves, you want a villa which is a real home for your family, not a copy of someone else's villa and NXTHO makes a team effort out of the construction process.

Our luxurious single-family villas summarise our clients' tastes and needs, supported by the latest technologies, in a smooth harmony with their impressive avant-garde designs.

- First occupation license
- Utility connections and final connection fee
- Independent quality control Company
- Decennial insurance fees
- Laboratory tests
- Quantity surveyors
- Health and security supervision
- Architect studies

SUSTAINABLE AND EFFICIENT ARCHITECTURE

We can define efficiency as the relationship between the resources used for an end and the achievements made. It is understood that efficiency occurs when less resources are used to achieve the same objective, or on the contrary, when more objectives are achieved with the same or fewer resources.

The range of constructive solutions with our system allows to reduce the resources used in construction (labor, auxiliary means, etc.) obtaining, in a shorter term, constructions of greater quality and comfort.

On the other hand, the obtaining of better thermal qualities and the elimination of thermal bridges in the enclosures supposes the improvement of the energetic efficiency of the buildings.

A sustainable architecture needs an effective and moderate constructive process in the use of natural resources.

Our system is solved with great fluidity, simplifying the construction process without generating debris and limiting the use of machinery, which reduces CO2 emissions.

GRESPANIA WHO ARE GRESPANIA?

GRESPANIA

Is an international ceramic manufacturing company, producing collections which boast both innovative technical properties as well as innovative cutting-edge designs. A combination of ongoing investments in further improving the manufacturing process, continual adaption to latest advances in design, and a permanent concern for the “good of the environment” have all helped “stamp” the Grespania brand as a global market leader for the past 40 years.

The possibilities within the Grespania product range are endless; from ideas for those seeking a touch of personality and unique style for her homes, to technical solutions for professionals involved in the most exciting building projects.

Grespania has three factories all equipped with state-of-the-art technology and the most advanced process for the production of porcelain floor tiles, with body wall tiles and large format porcelain slabs up to 1230x360 in size and in varying thickness as well as slabs in 10,50 mm and 12 mm thickness, ideal for kitchen worktops, tables and wardrobes. In addition to its production facilities, Grespania has two services centers in Santiago de Compostela, Granada, and Barcelona in Spain. The company has also 5 subsidiaries companies serving as distribution hubs in strategic European countries; France, the Netherlands, Poland and the UK.

Today, close to 40 years on, Grespania continues to build and look towards the future.

ECOLOGICAL COMMITMENT

Grespania has demonstrated a constant concern for the environment throughout his history. One of this company’s strongest commitments, therefore, is to develop strategies aimed at minimizing the environmental impact of its production process while increasing its positive effect on society.

PORCELANOSA GRUPO

WHO ARE PORCELANOSA?

PORCELANOSA GRUPO IS PRESENT IN ABOUT 150 COUNTRIES

PORCELANOSA produces high quality equipment for bathrooms, kitchens, dressing rooms, tiles and much more.

PORCELANOSA Group is today a major reference in both the Spanish and the International market. Its consolidated position has been built up on values such as innovation and quality, but specially the trust placed in its large human capital, made up of almost 5,000 skilled professionals, and its concern for its stakeholders and the environment.

With over 45 years of experience, PORCELANOSA Group is present in almost 150 countries worldwide. This success is the result of a unique business model based on a strong corporate strategy. According to a study published by the consultancy Pricewaterhouse Coopers and the Financial Times.

PORCELANOSA is one of Spain's most reputable companies in the international scene and is also considered by consumers to be a strong and solid company, as reflected in a study carried out by the Reputation Institute. Diversifying production has played a key role in the growth of a business group that started off manufacturing a single product: ceramic tiles. Today, the Group's eight firms offer a vast selection of products ranging from kitchen and bathroom equipment to high-tech materials and state-of-the-art building solutions for contemporary architecture.

ECOLOGICAL COMMITMENT

The concern for the care of the environment and the preservation of the environment have been a constant priority for the PORCELANOSA Group since its foundation. The sustainability of our lifestyle and its necessary balance with the environment requires concrete actions and tangible actions. PORCELANOSA Grupo, anticipating this new dynamic, has been improving its production system for more than 30 years, in order to minimize its impact on the environment.

PORCELANOSA Grupo's actions in the field of the environment go beyond the optimization of production systems, our effort is also focused on the design of products that contribute to reducing the consumption of water and energy in homes, such as taps with limiters flow or construction systems that allow the reduction of energy consumption in the heating of buildings.
